Strategy Description

This is a quantitative U.S. stock investment strategy that seeks to provide long-term capital appreciation over a full market cycle. Specifically, this strategy's integrated approach seeks to produce long-term returns that exceed the Russell 1000 U.S. Benchmark Index by investing in a portfolio of large capitalization U.S. stocks (ex-financials and real estate) that have substantial quality, value and price momentum factor advantages. The portfolio typically contains 50 modified market cap weighted stocks that are reconstituted and rebalanced at least quarterly.
